

# Diabetes Risk Assessment Report

Date: 05/06/2025, 10:22:11

Patient: John Doe

Age: N/A

**Risk Level: GREEN**

## Analysis:

Patient's HbA1c of 5.0% is within normal range (4.0-6.0%), and reported frequent urination could be unrelated to diabetes. Family history is negative.

## Recommendations:

- Monitor for persistent symptoms despite normal HbA1c
- Consider checking fasting glucose if symptoms continue
- Ensure adequate hydration and repeat test in 3-6 months per standard screening guidelines
